

Pledge Operation Sheet	
Pledge name and number: Open Data Euskadi and Linked Open Data. Pledge 2	
Pledge start and end date: 1 September 2018 - 31 August 2020	
Organisation driving the pledge	Basque Government. Directorate for citizen services and innovation and the improvement of the administration. Bizkaia Provincial Council. General Directorate for Transparency and Good Governance
Pledge description	
Issue to be addressed	<p>Citizens need information in the power of public administrations in order to conduct research, understand the reality of our society and generate wealth, culture, knowledge and so on.</p> <p>However, the information that is currently available (until the present 3,400 datasets have been published in Open Data Euskadi, of which 672 are federated with Vitoria and Bilbao City Councils and Gipuzkoa Provincial Council), is not used. This sometimes happens because the information is scattered, incomplete or out of date, and sometimes happens because the information is either not publicly available or is difficult to find or gather within a document for society as a whole.</p> <p>This issue can only be resolved through collaboration between the different administrations and wider society.</p>
What the pledge involves	<ul style="list-style-type: none"> • Identifying the most important content for organised and non-organised civil society, research staff, journalists, companies, students and so on. • Publishing this content in open formats which can be reused and which follow a common model for every administration and for society as a whole. This model will subsequently set the path for public administrations to publish other open data. • Creation of presentations which help to locate and understand information. <p>The end goal is to contribute towards open knowledge, making public data openly available and developing new services that generate wealth, culture and knowledge and/or help to improve accountability in public management.</p>
How this will help to resolve the issue	<ul style="list-style-type: none"> • By exploring the aspirations and motivations of society in a collaborative manner. • By establishing a common Basque model for making data

	<p>openly available, for every administration, with due protection of personal data.</p> <ul style="list-style-type: none"> • By analysing the difficulties in accessing and understanding information for different social profiles and by developing tools that help to localise, understand and analyse this information, including tutorials and assistance in managing it. 		
<p>Why this pledge is supported by the OGP</p>	<ul style="list-style-type: none"> • It consists of publishing more information, improving its quality, facilitating citizens' access to this information and improving the right to access information, and so on. Transparency is one of the fundamental values which drives the OGP. • It consists of creating opportunities, improving citizens' ability to influence or make decisions about the common good through having access to better knowledge, and encourages participation in public matters, which is a value which drives the OGP. 		
<p>Resources to be used to achieve this</p>	<ul style="list-style-type: none"> • Internal resources: <ul style="list-style-type: none"> ○ Inter-institutional collaboration group consisting of the Basque Government (4 people), the three Provincial Councils (3 people), and the City Councils for the three capitals (3 people). ○ Each administration will cover the costs incurred in opening datasets as determined by each organisation, following the standards established for their regularisation. ○ The Basque Government and Bizkaia Provincial Council will cover the costs incurred through work that is externally contracted. • Budget for external contracts: <ul style="list-style-type: none"> ○ Contract for the initial study of citizen demands and the selection of data to be opened and published. 18,149 Euros. ○ Contract for the construction of the Basque model for opening public data and the standardisation of this information (cost to be determined). ○ Contract for the generation of presentations of information (applications, search tools, visualisations and so on) (cost to be determined). 		
<p>Principal actions and results</p>	<p>Anticipated start date:</p>	<p>Anticipated end date:</p>	<p>Status (to be initiated /initiated/ underway/ completed)</p>
<p>Conformation of the inter-institutional working</p>	<p>September 2018</p>	<p>September 2018</p>	<p>Completed</p>

group			
Conformation of the group for Pledge 2	October 2018	October 2018	Completed
Selection of the sets of data requested by citizens	November 2018	January 2019	To be initiated
Opening and standardisation of data. Stage 1	February 2019	December 2019	To be initiated
Basque model for the opening of public data and the standardisation of information	February 2019	December 2019	To be initiated
Publication of open data. Stage 1	June 2019	December 2019	To be initiated
Accessible presentation of data. Stage 1	June 2019	December 2019	To be initiated
Opening and standardisation of data. Stage 2	January 2020	June 2020	To be initiated
Publication of open data. Stage 2	June 2020	August 2020	To be initiated
Accessible presentation of data. Stage 2	June 2020	August 2020	To be initiated
How we can ensure that we are progressing with the pledge	How we will subsequently ensure that it has served its purpose	Some data: <i>(provide the data from measurements that are being obtained)</i>	
Identification of a set of data of interest to consensual citizens and existing in Basque administrations	Level of consultation of open data (significantly higher than the current levels)		
Basque model for the opening of public data and the standardisation of information	Level of consultation of accessible presentations		
A significant selection of datasets to be opened and published; datasets which impact upon a range of Basque	Level of implementation of the model for opening public data and the		

institutions and are of interest to the public; with qualitative and quantitative criteria established	standardisation of information (100% in promoting institutions)	
The selected data have been published following the model established to a rate of 80% on completion of the plan	Level of public satisfaction with the information published	
One accessible presentation of data has been generated per year (determined by the complexity of the datasets to be linked)	Number of collaborations or alliances with other members of the OGP for the exchange of good practices in the opening of public data	
Level of satisfaction of the people participating in the Pledge group (above 7)		
Level of satisfaction of the people participating in the Regular Forum with regard to the process and end products (above 7)
