

# IN SEARCH OF SOCIAL VALUE THROUGH THE USE OF PUBLIC DATA FROM BASQUE PUBLIC ADMINISTRATIONS

**OBJECTIVE:** Identification of the main open data services to be published in accordance with the maturity of such data, existing citizen demand and their reuse options.

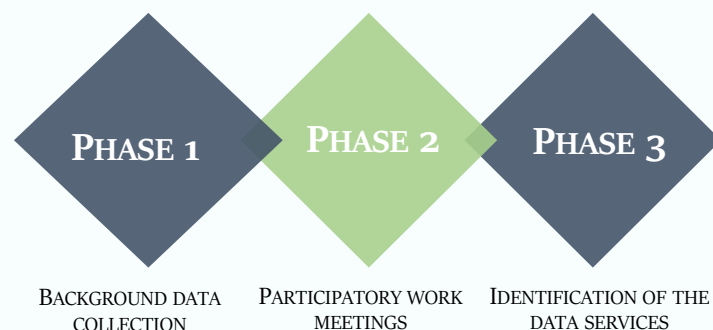

**DURATION:** November 2018 - March 2019

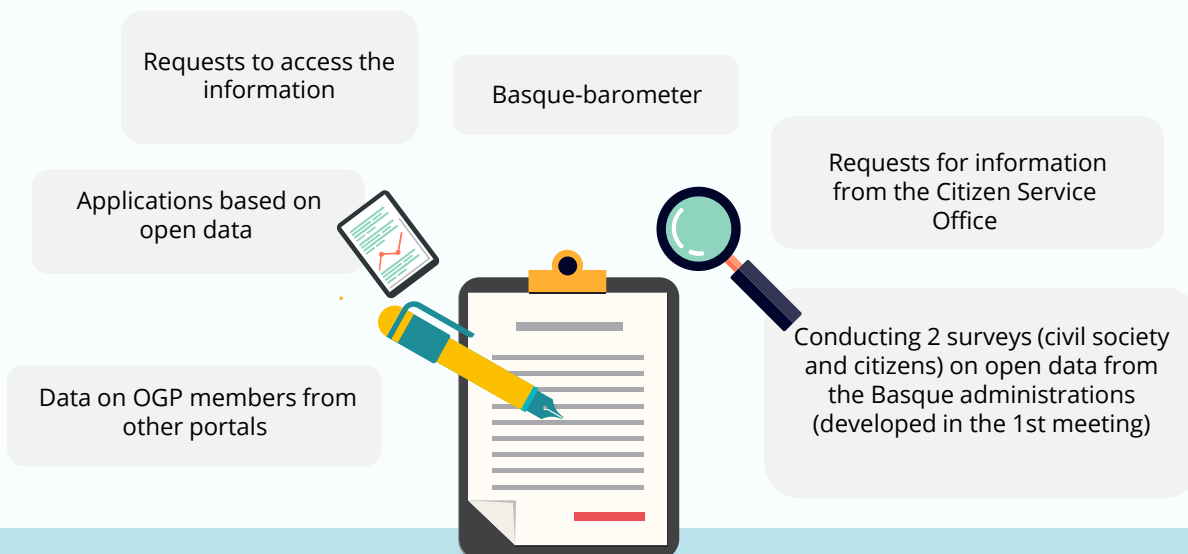

**PARTICIPANTS:** Commitment 2 Working Group

## WORK PROCESS

### 1) Data collection from different sources in which the main themes demanded have been identified

### 2) Participatory meetings with role-players from the Basque public administration, citizens and civil society

#### 1ST SESSION

**November 23 2018, Vitoria**

- Theoretical framework for reuse
- Survey validation

#### 2ND SESSION

**December 10 2018, Bilbao**

- Debate on data categorization, direct and indirect demand compiled in Phase 1 and proposals

#### 3RD SESSION

**February 4 2019, San Sebastian**

- Debate on the results of the surveys
- Debate on the need to publish some data of interest to citizens and proposals

#### 4TH SESSION

**March 25 2019, Bilbao**

- Debate on the publication situation in the different participating administrations
- Final selection of the 5 services to be developed

### 3) Identification of the data services

**Environmental quality service**  
Waste management, air quality, water quality and noise pollution

**Sustainable mobility service**  
Traffic, public car parks (location and occupancy) and public bicycles and cycleways

**Shared events agenda service**  
Municipal agenda, cultural events agenda and administrative events agenda

**Accountability service**  
Budgets and expenses, agreements and subsidies

**Sports and healthy life service**  
Data on sports facilities and parks and gardens
